

CABLE GLAND SHROUDS

CMP Products' cable gland shrouds minimise the risk of dirt or foreign substances gathering on the cable gland and point of cable to cable interface.

LSF cable shrouds are Low Smoke & Fume (LSF), and Phosphorus Free to suit all CMP SOLO Cable Glands. Manufactured from low smoke, self-extinguishing, non-drip and halogen free material, these shrouds are rated UL94 V0 and are essential for areas where fire safety is key. CMP LSF shrouds and CMP SOLO Cable Glands meet the requirements of the London Underground Fire Safety Regulations and as such, they are LUL approved for use within the London Underground network.

CMP cable shrouds are available in a variety of colours, not all colours are available in all materials, please enquire for further information.

Temperature ratings for CMP shrouds are as follows:

- PVC -60°C to +90°C
- LSF -60°C to +130°C
- PCP -60°C to +100°C

SPECIFICATION DATA

PVC Shrouds										
Standard Glands			A2/A2F	BW	CW/CX	CXT	E-Types	PX2K	T3CDS	TE1FU
Size	Metric	NPT
